

## Colleague Technology Support

**Description:** Throughout the school year, I have offered my technology assistance and support to my colleagues. I have assisted them with problems such as:

- Updating grade level website
- Finding new websites as teaching tools
- Explaining different options and lesson plans on the SMARTBoard
- Logging into our new software program
- Working with an iPad

**Impact:** The impact this had on me was that I had to always be available to assist and “study up” on the technologies myself. I found myself finding new websites to utilize and different activities to integrate in the classroom. I also took workshop classes offered by other teachers throughout the district to learn new things and strategies of technology integration and assistance.

**Intent:** I intend to continue being a support for my colleagues when using technologies and media. I also plan on taking more workshop classes myself so I can become more and more proficient in using technology.
