

Student Use Permission Slip

Description: Due to the high level of technology integration in the classroom, I needed to obtain parent consent for each student to use the computers. I created a permission slip stating the different activities that students will do while using technology. Before any student used the technology, I had to receive a signed permission form from the students' parent/guardian.

Impact: I received a permission slip for each of my students and all parents gave their consent for their child to use the different types of technology in the classroom. I also received a few notes stating that both parents and students were excited that technology was being integrated into the classroom and to benefit their education.

Intent: I intend to have all my parents each year sign this same permission slip in order for the students to utilize the technologies. I also intend to update this form with any new technologies and activities that are used.
