

## Website Resources for Educators

**Description:** Throughout the school year, I have created a list of websites for teachers to utilize. The list consists of interactive listening sites for students to use during computer time, free teacher resources, and website builders. I put this list on the Valley View share drive for teachers to access if wanted.

**Impact:** The impact this had on me was that I constantly found myself finding new websites to utilize and different activities to integrate in the classroom. Having this list, colleagues have been able to find new activities to integrate into the classroom. It has also worked out that colleagues have offered any websites that they have found and used in the classroom.

**Intent:** I intend to continue searching for new websites and free resources to build this list more and more and help my colleagues find more resources.
